

Oliver J Ng

Oliver has been involved in the industry for the last 19 years. During the last 14 years, he has been directly involved in the facade industry in various roles such as project management, design and construction of glazed facades, remedial and inspection works of existing facades. His major expertise involves facade consultancy to architects and developers for various building types, which include schematic design ideas, design development, detail documentation, prototype testing and the construction process. His key strength is in the coordination and management of varied and complex issues in commercial, educational, health and residential projects in Australia and overseas.

In his role as Project Director, he has been in charge of major projects that had to be delivered within budget, time and cost restraints. Being hands on, he has been heavily involved in the design, fabrication and installation process. Having collaborated with several notable international architectural firms such as Norman Foster, Grimshaw, David Marks, Cesar Pelli, RTKL and WATG, Oliver has an insight into ideas and technologies that are current within other parts of the world.

Oliver is a project manager who specialises in the design, fabrication and installation of unitized curtain walls, stick walls, high performance doors and windows and aluminium cladding. He has also gained experience with remedial and inspection works of existing facade systems, glass failures and waterproofing issues.
