

Oliver J Ng

Oliver has been involved in the construction industry for the last 22 years. During the last 20 years Oliver has focused and specialised in the facades industry. He has been directly involved in various roles such as project management, design and construction of point fixed glass wall, unitized and stick curtain wall and bespoke façade systems. He has been involved in various building types providing advice from system design up to completion. He has consulted to many architects and developers such as Norman Foster, Grimshaw, David Marks, Cesar Pelli, RTKL and WATG. His key strength is in the coordination and management of varied and complex issues in commercial, educational, health and residential projects in Australia and overseas.

In his role as Director/Practice Manager Oliver has been in charge of major projects that require delivery within budget, time and cost restraints. Being hands on, he is actively involved in the design, fabrication and installation process. Oliver has an insight into ideas and technologies that are current internationally and has presented at several global conferences such as GPD in Finland.

Oliver is a company Director and Practice manager whose emphasis is in bringing together the best team with the skills and expertise required for each individual project, being the design, fabrication and installation of unitized curtain walls, stick walls, high performance doors and windows and aluminium cladding.

Notable Projects include:

- 3 Billion New Royal Adelaide Hospital
- 1 Billion ITCC in Saudi Arabia
- Several high rise buildings over 300m high
